Buyers Laboratory Inc. (BLI) - the leading global office equipment testing lab and business consumer advocate since 1961 - awarded its performance certificate to Discovery 75g, after subjecting it to extensive runnability tests.

The BLI seal certifies that a product successfully completed demanding quality tests that proved its high working performance and that no problems with image quality, misfeeding, multi-sheet feeding, curl, dust accumulation or puckering were found. Working performance and image quality are two of the attributes most valued by office paper consumers.

Before awarding this certification, BLI carried out a series of thorough tests on Discovery paper brand, using a wide range of office reproduction equipment (namely photocopiers, printers, faxes and multifunctional devices) from various manufacturers. Globally, Portucel Soporcel group tested more than 5 million sheets in 87 different document imaging devices, from 15 different OEM's.

Specifically developed for professional high volume applications, Discovery's unique concept of lower grammage results in an efficient use of resources without compromising performance, as demonstrated by the BLI tests. The high quality of the raw materials and state-of-the-art technology used in the production of Discovery permit to substantially save on resources, namely water, wood and energy.

Since 1961, Buyers Laboratory Inc. (BLI) has been the leading global independent office-equipment testing lab and business consumer advocate. In addition to publishing the industry's most comprehensive and accurate test reports on office document imaging devices, each representing months of exhaustive hands-on testing in BLI's US and UK laboratories, the company has been the leading source for extensive runnability testing on imaging media and consumables, as well as extensive databases of specifications and pricing on copiers, printers, fax machines and multifunctional products. The company has a long-standing reputation for being the industry's most trustworthy and complete source for quality testing services and global competitive intelligence.
